VISUAL INVENTORY SERVICES

In the event of a catastrophic event, theft or damage, the burden of proof is up to the owner to establish value and a complete inventory of what they own. This can be a challenging endeavor in retrospect, which is why our experienced appraisal team has developed a Visual Inventory product that can streamline the insurance claim process in the event of a loss.

Our team of seasoned Appraisal professionals will document and provide a photographic record of the residence, including the exterior, individual rooms, and all remaining contents. Significant assets determined to be over \$50,000 in retail replacement value will be identified, and recommendations for individually documenting and appraising these items may be provided. The Visual Inventory is a high-resolution, professionally edited video of still images that is provided to the client via digital copy. The Visual Inventory is stored on file with The Fine Art Group in a backed-up, secure drive. In the event of a loss, The Fine Art Group will be able to provide the client quickly and efficiently with the price to replace the lost or damaged assets captured in the Visual Inventory.
